# **Hanging things in high places**

Last Updated: Saturday, November 10th, 2012, Created: Friday, November 2nd, 2001

Joe and Debbie sent in this tip. Use a large clothes-pin style clip, used for clamping or lamp attachment. Grip it onto the end of a plastic pipe. Now you can slide that right up to catch plant hooks, allowing you to lift them up to or down from high places. Oh, the gadget I had for watering hanging plants is called the Water Wand.
