# **Working with Sheet Metal - the Crimper**

Last Updated: Wednesday, March 27th, 2013, Created: Tuesday, September 14th, 1999

We visited with Wayne Walsh, a professional sheet metal worker and checked out all his hand custom tools that he uses to shape something as simple as a plumbing stack flange for the roof. In the photo you see a simple pair of crimpers, the right tool to put a pleated male end on a cut piece of ventilation ducting.
