Green slime on a BC deck

Last Updated: Wednesday, March 27th, 2013, Created: Thursday, September 14th, 2000

Gerry, one of the Home Improvement Guys on CFUN radio in Vancouver joined me in working on a solution for Ramona's slimy green BC deck which you can see in the photo. Here is the Home Improvement Guys' BC mix for removing outdoor slime: FALL CLEANING FORMULA (also known as Spring Cleaning Formula) 2/3 cup of trisodium phosphate or TSP substitute 1/3 cup of detergent 1 quart of household bleach 3 quarts of warm water Shake vigorously Spread and work in with a stiff broom Power washer it off
