My guest was Charlie Harte from DeWalt. We took a look at some of the accessories you can use with portable power drills. Of special interest was the new QUICK CHANGE chuck that allows you to chuck a small hex shaft special chuck into your drill's chuck. Then any 1/4 inch hex shaft drills, drivers and the like can be "quick chucked" in and out almost instantly, giving you the speed of a keyless chuck without any slip. DeWalt accessories are available in stores across the country.
