Metal Plating

Last Updated: Thursday, March 28th, 2013, Created: Thursday, September 14th, 2000

The metal plating industry was in its heyday when we all had chrome plated car bumpers. But it is still alive and healthy. On my TV show we took a tour of a plating shop to see metal hardware from all around the house getting cleaned up and a bright new finish being put on. The finishes available are amazing, from the traditional copper or chrome, to antique or even new 'metallic' colours. Chuck Kotowick was our guest from Mayfair Plating in Toronto.
